# CabLock™

## Versatile Storage, Point-of-Use Access

The CabLock is an expandable, electronic locking drawer system designed to accurately track the usage of both consumable and reworkable inventory at the point of use. Driven by CribMaster software, the system enables the controlled distribution of MRO inventory among your employees anywhere in your facility. The barcode scanning feature saves time and reduces manual errors allowing you to streamline issue and return processes. The on-board computer system collects real-time data allowing managers to make informed decisions about inventory stocking levels.

- Provides various levels of security
- Creates accountability among users
- Keeps items separated with compartmental drawers
- Generates detailed reports by department, job, or employee

## CabLock Configurations

The CabLock is available in an assortment of mix and match configurations with a variety of heights, widths, number of drawers, and interior compartments. The CabLock operates as a main or auxiliary unit.
