

WeighStation™

Simplified Dispensing, Advanced Control

The WeighStation automates dispensing by utilizing precise weight-sensing technology paired with robust software that effectively streamlines purchasing, replenishment, and dispensing processes. It removes productivity barriers by allowing authorized employees 24/7 access to all of their high-use supplies in one location at the point of use. Each time supplies are removed, the inventory is automatically adjusted and the system displays the quantity removed on the touchscreen.

- Easy to replenish as inventory repacking is not required
- Ideal choice for internal distribution of bench stock
- Clear doors and pull-out shelves for maximum visibility and accessibility
- Auxiliary unit easily expands footprint and functions as a second crib to allow for added security through employee permissions

WeighStation Configurations

The WeighStation is available in single or double cabinet configurations and comes standard with wheels and feet for easy movement.
