# CRIBMASTER

A Global Partner Delivering

INVENTORY & ASSET MANAGEMENT SOLUTIONS

We partner with our customers to help them exceed their operational objectives.

For more than two decades, CribMaster has worked directly with its customers and partners to deliver leading solutions that improve the performance of manufacturing facilities and job sites all over the world. By providing intelligent inventory and asset management solutions, we help our customers optimize their operations.

Driven by our software platform, our comprehensive portfolio of vending and tool control solutions provides real-time intelligence to ensure that the right assets go to the right workers at the right time — reducing operational costs, increasing productivity, improving compliance and minimizing safety risks. Together with our technical experts, our solutions help solve the most critical challenges in indirect material management.

## Industrial Innovation

Our innovation focuses on supporting the future needs of our customers. We are continually developing new technologies that provide industrial managers with increasing visibility and real-time intelligence across their facilities. Our solutions will continue to play a key role in the Industrial Internet of Things as we build the connected factory of the future.

### STANLEY

We are a STANLEY brand, part of the Stanley Black & Decker organization.

## Leaders For 20+ Years

20+ years as global leaders in inventory and asset management solutions for industrial environments.

**12,000** customers in **36** countries

**ISO 9001:2015** Certified

## Relentless commitment to customer satisfaction:

Voice of the customer is a key component of our innovation. We maintain longstanding relationships built on open communication with our users, enabling us to collaborate and concentrate on developing solutions that provide exceptional customer value.

## Most comprehensive solution portfolio:

We offer the widest portfolio of inventory and asset management solutions and services to cover almost any industrial scenario—all powered by one unified software platform.

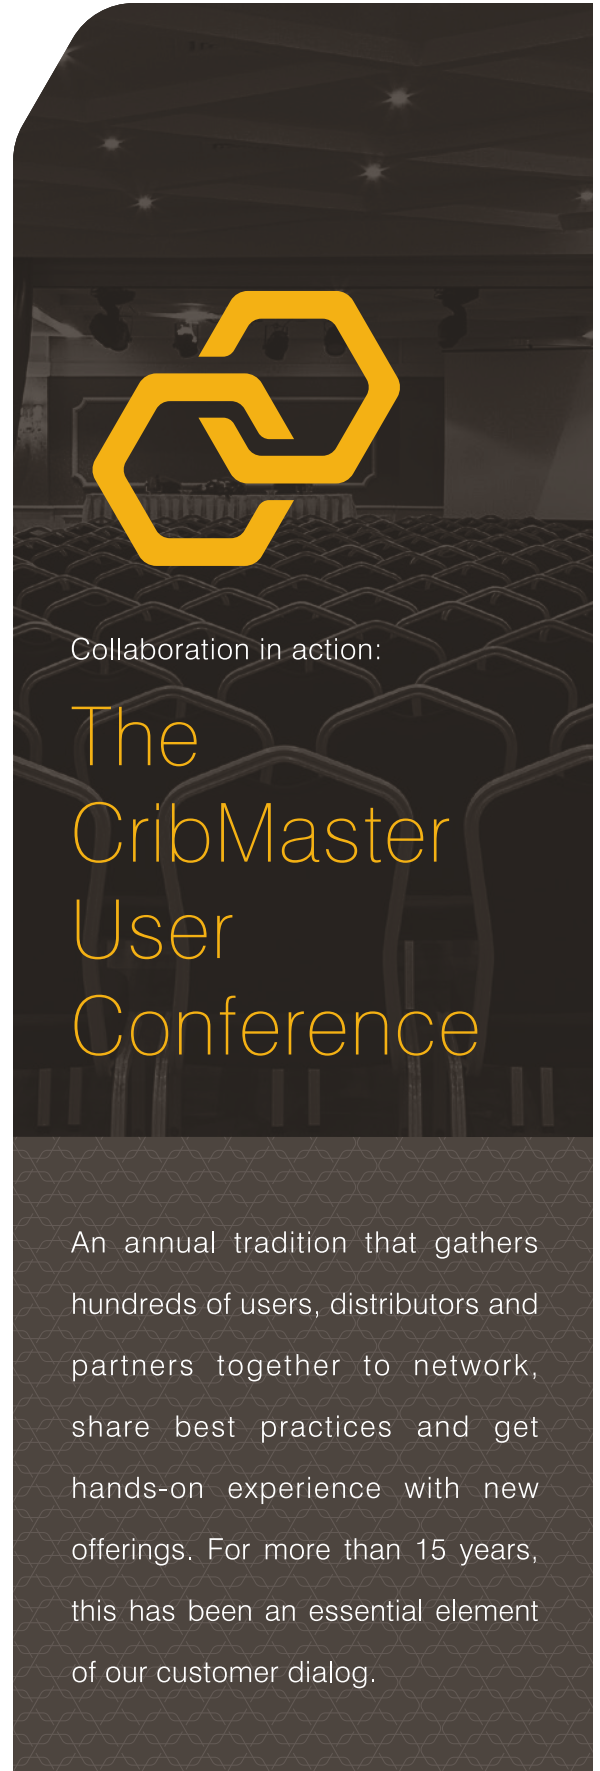

## Deep know-how of industrial environments:

CribMaster experts have vast industry knowledge and an understanding of how customers can implement our solutions for the most effective return on their investment.

## Global reach:

With a global reach and an extensive network of distributors, integrators, partners and VARs, we offer enterprise-wide standardization across your facilities located anywhere in the world.

Collaboration in action:

## The CribMaster User Conference

An annual tradition that gathers hundreds of users, distributors and partners together to network, share best practices and get hands-on experience with new offerings. For more than 15 years, this has been an essential element of our customer dialog.

## Eliminate inefficiencies and make fast, well-informed decisions.

Driven by a sophisticated software platform and backed by an experienced, coordinated team, our customizable inventory and asset management offerings increase efficiency and deliver detailed business intelligence on an enterprise-wide scale.

### Software Solutions

The CribMaster Inventory Management System offers an advanced platform to track, manage and automate indirect material flows. The same software drives all CribMaster solutions, collecting information from multiple devices, tool cribs and sites in a single database. The software integrates with existing ERP/MRP and other business systems to optimize automated replenishment and purchasing.

### Industrial Vending Solutions

CribMaster's modular industrial vending solutions make supplies available directly where workers need them, while maintaining the proper level of security at the point of use. We offer the industry's broadest variety of technologies and configurations, providing customers with maximum inventory flexibility and improved productivity anywhere on the shop floor.

## Tool Control Solutions

Tool control solutions combined with RFID tracking provide peace of mind for items that require constant traceability. Our customizable solutions work inside the tool crib or storeroom, in work areas or even in remote locations to allow you to automatically record issues and returns.

## Services

CribMaster services cover everything from initial solution design through post-installation support.

### Hosting

Complete database setup, monitoring and server infrastructure

### Data & Integration

Data migration, custom reporting and interfacing with existing systems

### RFID Services

On-site technical evaluations and site surveys, along with RFID asset tagging, storage configuration and final deployment

### Training

Classroom, electronic and workshop education developed for specific users

### Implementation

On-site setup, configuration, training and deployment of all solution components

### Technical Support

Global troubleshooting and problem solving; live help available for 16 hours during business days

## Automatically Manage Essential Inventory Types

CribMaster customers rely on our solutions to manage a wide array of indirect material, which represent significant opportunities for extensive cost savings and production efficiency.

With CribMaster solutions, our industrial manufacturing customers gain the capabilities to streamline their supply chains, transition to leaner inventories, ensure that assets are available and create a culture of employee accountability.

# As a result of implementing CribMaster solutions, typical MRO inventory reductions range from 25-40%.

## Reduce Costs

Track inventory and assets with certainty to lower expenses by minimizing loss and optimizing supply levels.

## Increase Productivity

Give workers the right tools and supplies at the right time—and at the point of use—to reduce idle time and work hours spent searching for missing inventory.

## Minimize Safety Risks

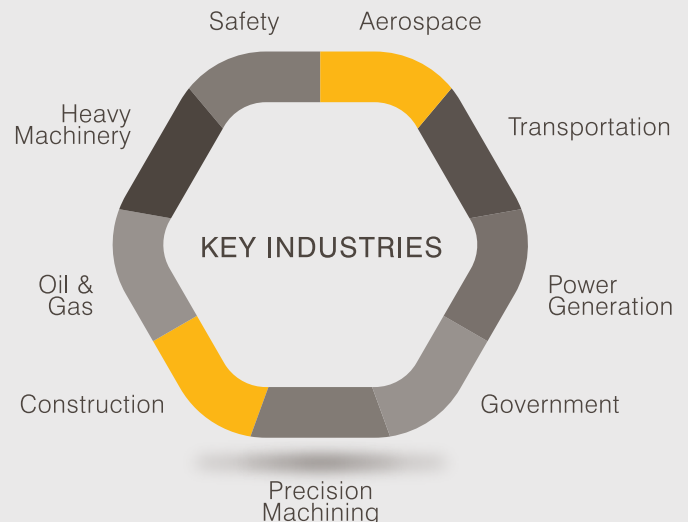

Maximize the safety of your workforce and enhance the safety of your end products with tighter tool controls and accurate usage records.

## Improve Compliance

Support audit needs and processes to meet regulation requirements and mitigate noncompliance concerns.

## Who We Serve

As a market leader, we have broad experience working with industrial manufacturers of all sizes. In addition, we cultivate a network of industrial distributors, system integrators and VARs that support our solutions.
